

# AMRIZE EXCESS SOIL MANAGEMENT SERVICES

## INNOVATIVE SOLUTIONS FOR SMARTER, COMPLIANT SOIL HANDLING

At Amrize, we provide an innovative approach to managing, transporting, and reusing excess soil across Canada. By applying advanced processes and regional expertise, we help our customers meet environmental regulations, reduce costs, and achieve operational efficiency, turning material movement into measurable value.

## Our Approach: Smarter Soil Solutions

As a leader in advanced building materials and site services, Amrize is reimagining how the industry manages materials.

Our Excess Soil Management network helps professional builders move beyond traditional soil disposal with a modern, performance-driven approach. Through consistent processes, regional expertise and reliable quality control, we deliver traceable and efficient solutions that improve timelines and manage project costs.

We focus on:

- **Efficiency:** Strategically located acceptance sites minimize haul distances and improve turnaround time.
- **Innovation:** Standardized digital tracking and soil classification processes simplify compliance.
- **Reliability:** Our acceptance criteria and quality control ensure every delivery meets regional standards.
- **Performance:** We connect soil recovery with our broader solutions, from aggregates to infrastructure, to close the loop in construction.

## Why Choose Amrize

### 1. Comprehensive Service:

We manage every stage of excess soil movement, from classification and transport to placement and reuse.

### 2. Regulatory Confidence:

Our acceptance processes meet or exceed provincial standards, ensuring full traceability and documentation for customers.

### 3. Regional Expertise:

Our teams understand local differences and partner closely with municipalities, developers, and contractors to streamline approvals.

### 4. Scalable Capacity:

With multiple active sites across key regions, Amrizecan handle large volumes for both small- and large-scale projects.

### 5. Connected Value:

Excess soil management integrates seamlessly into the Amrize network, supporting efficient, circular, and future-ready construction systems.
