# SAFETY DATA SHEET

### 1. Identification

**Product identifier Deicing Agent** 

Other means of identification

**Synonyms** Calcium Sand, Calcium Sand M1000

Recommended use Construction and roads.

**Recommended restrictions** Workers (and your customers or users in the case of resale) should be informed of the potential

> presence of respirable dust and respirable crystalline silica as well as their potential hazards. Appropriate training in the proper use and handling of this material should be provided as required under applicable regulations. DO NOT use this product for abrasive blasting. Uses other than the

recommended use.

Manufacturer/Importer/Supplier/Distributor information

Company name Amrize Inc.

**Address** 6509 Airport Road

Mississauga, Ontario L4V 157

Eastern Canada: (905) 738-7070 **Telephone** 

Western Canada: (403) 225-5400

Website www.amrize.com E-mail sdsinfo@amrize.com

**Emergency telephone** 

CHEMTREC within USA and Canada: 1-800-424-9300

number

CHEMTREC outside USA and Canada: +1 703-527-3887 (collect calls accepted)

#### 2. Hazard identification

**Physical hazards** Not classified.

**Health hazards** Serious eye damage/eye irritation Category 2A

> Carcinogenicity (inhalation) Category 1A

Specific target organ toxicity - repeated

exposure (inhalation)

Label elements

Signal word Danger

Causes serious eye irritation. May cause cancer by inhalation. May cause damage to organs **Hazard statement** 

(Lungs) through prolonged or repeated exposure by inhalation.

**Precautionary statement** 

Prevention Obtain special instructions before use. Do not handle until all safety precautions have been read

and understood. Do not breathe dust. Wash thoroughly after handling. Wear protective

gloves/protective clothing/eye protection/face protection.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present Response

and easy to do. Continue rinsing. IF exposed or concerned: Get medical advice/attention. If eye

Category 2 (Lungs)

irritation persists: Get medical advice/attention.

Store locked up. Storage

**Disposal** Dispose of contents/container in accordance with local/regional/national/international regulations.

Supplemental information None

Other hazards None known.

## 3. Composition/information on ingredients

### **Mixtures**

**Deicing Agent** SDS Canada 971846 Version #: 01 Revision date: -1/7 Issue date: 19-May-2025

Chemical name	Common name and synonyms	CAS number	%
Quartz		14808-60-7	80 - 100
Calcium chloride		10043-52-4	10 - 30
Magnesium chloride		7786-30-3	1 - 5

### **Composition comments**

All concentrations are in percent by weight. Components not listed are either non-hazardous or are below reportable limits. Any concentration shown as a range is to protect confidentiality or is due to batch variation.

## 4. First-aid measures

Inhalation Move to fresh air. If not breathing, give artificial respiration. Call a physician if symptoms develop

or persist.

Skin contact Wash off with soap and water. Get medical attention if irritation develops and persists.

Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if Eye contact

present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Rinse mouth. Get medical attention if symptoms occur. Ingestion

Most important symptoms/effects, acute and delayed

Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred

vision. Coughing. Prolonged exposure may cause chronic effects.

Indication of immediate medical attention and special treatment needed

Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

**General information** IF exposed or concerned: Get medical advice/attention. If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s)

involved, and take precautions to protect themselves.

## 5. Fire-fighting measures

Suitable extinguishing media

Unsuitable extinguishing media

Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from

the chemical

During fire, gases hazardous to health may be formed. Combustion products may include: Calcium oxides. Chlorides. Magnesium oxides. Potassium oxides. Silicon oxides. Sodium oxides.

Special protective equipment and precautions for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions

Use water spray to cool unopened containers.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards No unusual fire or explosion hazards noted.

### 6. Accidental release measures

Personal precautions. protective equipment and emergency procedures

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Do not breathe dust. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up The product is immiscible with water and will sediment in water systems.

Large Spills: Stop the flow of material, if this is without risk. Following product recovery, flush area with water.

Small Spills: Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use. Put material in suitable, covered, labelled containers. For waste disposal, see section 13 of the SDS. The product is insoluble in water.

# **Environmental precautions**

Avoid discharge into drains, water courses or onto the ground.

# 7. Handling and storage

## Precautions for safe handling

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep formation of airborne dusts to a minimum. Provide appropriate exhaust ventilation at places where dust is formed. Do not breathe dust. Avoid contact with eyes. Avoid prolonged exposure. Should be handled in closed systems, if possible. Wear appropriate personal protective equipment. Wash thoroughly after handling. Observe good industrial hygiene practices.

**Deicing Agent** SDS Canada 971846 2/7 Version #: 01 Revision date: -Issue date: 19-May-2025

Store locked up. Store in tightly closed container. Store away from incompatible materials (see section 10 of the SDS).

# 8. Exposure controls/personal protection

SDS Canada **Deicing Agent** 971846 Version #: 01 3/7 Revision date: -Issue date: 19-May-2025

General hygiene considerations

Observe any medical surveillance requirements. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

## 9. Physical and chemical properties

Physical state Solid.

Form Crystalline powder.

Colour White to grey. Brown.

Odour Odourless.

Odour threshold Not applicable.

**Melting point/freezing point** Property has not been measured.

Boiling point or initial boiling point and boiling range

> 1000 °C (> 1832 °F)

**Flammability** The product is non-combustible.

Upper/lower flammability or explosive limits

Explosive limit - lower (%) Not applicable, material is a solid.

Explosive limit - upper Not applicable, material is a solid.

(%)

Flash point

Auto-ignition temperature

Not applicable, material is a solid.

Not applicable, material is a solid.

Property has not been measured.

**pH** 7

pH concentrationProperty has not been measured.Kinematic viscosityNot applicable, material is a solid.

Solubility

Solubility (water) Insoluble

Partition coefficient Not applicable for inorganic substances.

(n-octanol/water) (log value)

Vapour pressureProperty has not been measured.Vapour pressure temp.Property has not been measured.

Density and/or relative density

**Density** Property has not been measured.

Relative density 2.8

Relative density temperature

Property has not been measured.

Vapour density Not applicable, material is a solid.

**Particle characteristics** 

Particle size distribution Property has not been measured.

Other information

**Evaporation rate** Not applicable, material is a solid.

**Explosive properties** Not explosive. **Oxidising properties** Not oxidising.

Viscosity Not applicable, material is a solid.

## 10. Stability and reactivity

**Reactivity** The product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical stability Material is stable under normal conditions.

Possibility of hazardous

reactions

No dangerous reaction known under conditions of normal use.

**Conditions to avoid**Contact with incompatible materials.

Incompatible materials Powerful oxidizers. Chlorine. Hydrofluoric acid. Fluorine. Boron trifluoride. Manganese trioxide.

Oxygen difluoride.

**Hazardous decomposition** No hazardous decomposition products are known. In the event of fire: See Section 5.

products

Deicing Agent SDS Canada 971846 Version #: 01 Revision date: - Issue date: 19-May-2025 4 / 7

# 11. Toxicological information

## Information on likely routes of exposure

**Inhalation** May cause damage to organs through prolonged or repeated exposure by inhalation. May cause

cancer by inhalation.

**Skin contact** Prolonged skin contact may cause temporary irritation.

Eye contact Causes serious eye irritation.

Ingestion May be harmful if swallowed.

Symptoms related to the physical, chemical and toxicological characteristics

Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred

vision. Coughing. Prolonged exposure may cause chronic effects.

### Information on toxicological effects

**Acute toxicity** May be harmful if swallowed.

Components Species Test Results

Calcium chloride (CAS 10043-52-4)

Acute Dermal

LD50 Rabbit > 5000 mg/kg, 24 Hours

Oral

LD50 Rat 1000 mg/kg

Magnesium chloride (CAS 7786-30-3)

Acute Dermal

LD50 Rat > 2000 mg/kg, 24 Hours

Oral

LD50 Rat 300 - 2000 mg/kg

Quartz (CAS 14808-60-7)

Chronic Inhalation

LOEC Human 0.0563 mg/m3

**Skin corrosion/irritation** Prolonged skin contact may cause temporary irritation.

Serious eye damage/eye

irritation

Causes serious eye irritation.

Respiratory or skin sensitisation

Respiratory sensitisation

Not a respiratory sensitiser.

**Skin sensitisation** This product is not expected to cause skin sensitisation.

**Germ cell mutagenicity**No data available to indicate product or any components present at greater than 0.1% are

mutagenic or genotoxic.

Carcinogenicity In 1997, IARC (the International Agency for Research on Cancer) concluded that crystalline silica

inhaled from occupational sources can cause lung cancer in humans. However in making the overall evaluation, IARC noted that "carcinogenicity was not detected in all industrial circumstances studied. Carcinogenicity may be dependent on inherent characteristics of the crystalline silica or on external factors affecting its biological activity or distribution of its polymorphs." (IARC Monographs on the evaluation of the carcinogenic risks of chemicals to humans, Silica, silicates dust and organic fibres, 1997, Vol. 68, IARC, Lyon, France.) In June 2003, SCOEL (the EU Scientific Committee on Occupational Exposure Limits) concluded that the main effect in humans of the inhalation of respirable crystalline silica dust is silicosis. "There is sufficient information to conclude that the relative risk of lung cancer is increased in persons with silicosis (and, apparently, not in employees without silicosis exposed to silica dust in quarries and in the ceramic industry). Therefore, preventing the onset of silicosis will also reduce the cancer risk..." (SCOEL SUM Doc 94-final, June 2003) According to the current state of the art, worker protection against silicosis can be consistently assured by respecting the existing regulatory occupational exposure limits. May cause cancer by inhalation. Occupational exposure to

respirable dust and respirable crystalline silica should be monitored and controlled.

**ACGIH Carcinogens** 

Quartz (CAS 14808-60-7) A2 Suspected human carcinogen.

 Deicing Agent
 SDS Canada

Canada - Manitoba OELs: carcinogenicity

Quartz (CAS 14808-60-7) Suspected human carcinogen.

Canada - Quebec OELs: Carcinogen category

Quartz (CAS 14808-60-7) Suspected carcinogenic effect in humans.

IARC Monographs. Overall Evaluation of Carcinogenicity

Quartz (CAS 14808-60-7) 1 Carcinogenic to humans.

US. National Toxicology Program (NTP) Report on Carcinogens

Quartz (CAS 14808-60-7) Known To Be Human Carcinogen.

Reproductive toxicity

This product is not expected to cause reproductive or developmental effects.

Specific target organ toxicity -

single exposure

Not classified.

Specific target organ toxicity -

repeated exposure

May cause damage to organs (Lungs) through prolonged or repeated exposure by inhalation.

**Aspiration hazard** Not an aspiration hazard.

Chronic effects Prolonged inhalation may be harmful. May cause damage to organs through prolonged or

repeated exposure. Prolonged exposure may cause chronic effects.

# 12. Ecological information

**Ecotoxicity** The product is not classified as environmentally hazardous. However, this does not exclude the

possibility that large or frequent spills can have a harmful or damaging effect on the environment.

**Species Test Results** Components Calcium chloride (CAS 10043-52-4) **Aquatic** Acute Crustacea EC50 Daphnia magna 1062 mg/l, 48 hours Fish LC50 Pimephales promelas 4630 mg/l, 96 hours Chronic Crustacea EC50 Daphnia magna 610 mg/l, 21 days

Persistence and degradability

The product contains inorganic compounds which are not biodegradable.

Bioaccumulative potential

No data available.

Mobility in soil

The product is insoluble in water. Not expected to be mobile in soil.

Other adverse effects No data available.

## 13. Disposal considerations

Disposal instructions Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of

contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations Disp

ions Dispose in accordance with all applicable regulations.

Hazardous waste code

The waste code should be assigned in discussion between the user, the producer and the waste

disposal company.

Waste from residues / unused

products

Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner.

Contaminated packaging

Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or

disposal.

## 14. Transport information

#### **TDG**

Not regulated as dangerous goods.

### IATA

Not regulated as dangerous goods.

#### **IMDG**

Not regulated as dangerous goods.
